Abstract:

A survey was conducted through the Internet on the topic of turfgrass extension service in the United States. The questionnaire was sent out to all turfgrass extension specialists in the US. The purpose of the survey was to assess the current state of turfgrass extension service in terms of funding, support, and overall interest. Key areas covered by the survey include funding and financial support, split appointments, time demands, and the role of research in extension. Results of the returned questionnaires from the Western region of the United States will be summarized and presented.
